OUR GREENHOUSES

FROM THE FIELDS OF COLOMBIA TO YOUR DOOR

WHY COLOMBIA?

Colombia has the ideal climate to grow the world's most stunning flowers.

Our roses arrive in the bud stage which protects the flowers and ensures the longest life possible.

FROM THE
FLOWER
CAPITAL
OF THE
WORLD

HAND- PICKED

We ensure that all of our flowers are hand-picked in a sustainable environment.

We use natural agricultural methods and we treat our workers with fairness, dignity and respect.

SHIPPING

Our flowers are shipped and maintained in a temperature-controlled environment at all times. They are more beautiful and will last longer than any flowers that you have ever experienced.

HOW TO TAKE CARE OF YOUR FLOWERS

Carefully remove the flowers from the packaging as soon as possible. (There are two layers). Cut about $\frac{1}{2}$ inch off the bottom of the stems at an angle and strip leaves that would touch the water.

Fill a large vase about $\frac{1}{3}$ of the way with fresh water and mix in the flower food. If you don't have the flower food you can add a teaspoon of sugar.

Arrange the flowers in the vase to your desire. Place them in a cool spot for the longest life and ENJOY!

ENJOY THE BEST
